Department of Environmental Quality requirements for Building Safety permits

The following items DEQ requires a permit and approval prior to the issuance of a building permit:

- All new Single Family Dwellings.
- All bedroom additions.
- All Commercial structures.
- All new Manufactured Homes.
- All replacement manufactured homes where bedrooms are added.
- Any plumbing installed where none existed on the property; such as shop with bath, if allowed, with no existing dwelling.
- Plumbing installed where a pump is required due to lack of gravity flow.
- All in ground swimming pools.

It is the applicant's responsibility to provide **Building Safety** an accurate site plan. The site plan shall include, all property lines, existing structures, the new proposed structure, septic tank, sewer line and drain field, location of well, water lines, power lines, and location of service panel. Please show location of property access and road frontage. Site plan shall be accurate, legible, and a minimum of 8 1/2 x 11.

Please provide owners name, address, map and tax lot number and contact information.

All other new structures and or additions provide the site plan and complete Building Safety's DEQ exemption form. It is the applicant.

Respectfully,

Handwritten signature of Mark O. Stevenson, with the initials "CBO" written to the right of the signature.
